

Teaching English to Young Learners

"It's not only a good means to reflect on teaching strategies but a great opportunity to share, exchange, discuss and debate on thought provoking topics."

Caroline Mazaud, June 2016

This new two-week course explores techniques to motivate and encourage secondary level students aged 11-19 to use the language as a tool for real communication. Personal language development concentrates on oral fluency and colloquial English. Methodology concentrates on practical ideas for teaching younger learners. Participants are invited to reflect on various aspects of the English language classroom.

Course Dates

Sun 1st - Sat 14th July 2018

Sun 26th Aug - Sat 8th Sept 2018
